PROFESSIONAL SUMMARY

Full Stack Developer and IT professional currently completing a Bachelor's degree (S1) in Informatics Engineering at STMIK Kaputama Binjai, with hands-on freelance experience since 2021 delivering 250+ end-to-end web and mobile projects for clients across diverse needs. Proficient in building responsive frontend interfaces (React, Vue, Next.js) and scalable backend systems (Node.js, Java Spring, PHP Laravel, Python Django/Flask), backed by strong database and cloud expertise (MySQL, PostgreSQL, MongoDB, Firebase, Supabase, Google Cloud Platform, Vercel, Netlify, Docker). Also experienced in native mobile app development for Android and iOS using Java and Kotlin. Complements technical development skills with strong data analysis capability, including advanced Microsoft Excel, SQL, Power BI, and Tableau, as well as graphic design and UI/UX design using Figma, Adobe XD, Photoshop, Illustrator, CorelDRAW, and Canva. Brings a solid operational foundation from prior roles in production, warehouse management, inventory control, and IT/network services, offering practical insight into real business processes, documentation, and client needs. Proactive, detail-oriented, and results-driven, with strong problem-solving, communication, and teamwork skills, and an active interest in Digital Marketing and applying AI tools and prompt engineering to improve development and business workflows. Experienced managing freelance client projects fully remotely, working independently across different time zones with strong self-management, reliability, and asynchronous communication using tools such as Git, GitHub, and standard project collaboration platforms. Comfortable working in distributed, cross-functional teams and seeking a remote Full Stack Developer role where I can contribute technical depth, adaptability, and consistent, self-driven delivery.

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer & Graphic Designer — Self-Employed

Remote / Binjai, Indonesia | 2021 – Present

- Delivered 250+ freelance web development projects end-to-end, from concept and UI/UX design to deployment, based on individual client requirements.
- Develop both frontend and backend features, including database structure and API integration.
- Create graphic design assets for client branding and digital content using Photoshop, Illustrator, CorelDRAW, and Canva.
- Coordinate directly with clients from initial concept through final delivery.
- Manage website deployment, hosting, and domain configuration.

- Perform ongoing maintenance, updates, and troubleshooting for client websites.

Warehouse Staff — PT. KS Binjai

Binjai, Indonesia (Contract) | January 2025 – July 2025

- Managed and issued thousands of spare parts and workshop equipment items, ensuring smooth technician operations.
- Conducted monthly stock opname (physical inventory count) covering thousands of tools and spare parts.
- Maintained availability and organized storage of tools within the warehouse.
- Coordinated with technicians regarding spare part requirements.
- Recorded incoming and outgoing goods into the inventory system.

Warehouse Administration Staff — PT. Quantum Nusantara

Binjai, Indonesia (Contract) | November 2023 – December 2024

- Managed receiving, storage, and distribution of 5,000+ network equipment units per month (modems, routers, cables, fiber optic devices, ONTs).
- Prepared precon cables, fiber optic materials, and installation equipment for a team of 40 field technicians.
- Updated and input device data, including dismantled units and serial numbers, into the OSS system.
- Scanned technician handover documents (BAST) for installation, removal, and maintenance activities.
- Compiled records and performed routine stock opname to ensure inventory data accuracy.
- Maintained technician tools (Splicer, OTDR, OPM, etc.) to ensure readiness for field use.
- Prepared daily reports on stock condition, stock opname results, and goods distribution.

Production Staff — Aneka Kreatif Studio

Binjai, Indonesia (Permanent) | July 2021 – September 2023

- Operated digital and offset printing machines, producing approximately 500 print outputs per day according to production requirements.
- Performed quality checks on printed output to ensure compliance with company standards.
- Edited and prepared design files using CorelDRAW, Photoshop, and related software prior to printing.
- Handled finishing processes, including cutting, laminating, binding, and screen printing.
- Performed light maintenance and troubleshooting of production machinery.
- Coordinated with design and marketing teams to ensure printed output met client requirements.
